

Qohash Recon™

Advanced on-premise file analysis and data classification solution

OVERVIEW

Qohash Recon™ is the most advanced on-premise file analysis and data classification solution. Designed to find your most sensitive data, Recon™ supports leading cloud-based, user-centric storage technologies as well as endpoints and servers. Qohash Recon™ finds and classifies PII 10x faster than competing solutions, whether on Windows, Mac or Linux machines, all in a compact, efficient sensor.

Qohash Recon™ is ideal for organizations with PII, PHI or other sensitive data that users or 3rd party services process. Examples include banks, insurance companies, consumer services, regulators, auditors, legal firms or anyone tasked with finding and securing sensitive data. With Qohash Recon™ you can quickly find where your most sensitive data resides, minimizing your risk and compliance costs while improving your agility.

KEY BENEFITS

Qohash Recon™ is designed to address the needs of commercial and enterprise-scale organizations required to maintain their data completely in-house. Intuitive results can be interpreted by in-house staff or via your preferred consulting or service provider team.

- ✓ Data remains completely on-premise. No data communication back to Qohash
- ✓ Identify sensitive data location, type, classification and regulatory risk
- ✓ Export scan results to a CSV to perform custom analyses or build your own reports
- ✓ Comprehensive dashboard for interpreting data discovery results

VALUE OF QOHASH RECON™

Modern business models increasingly handle large data sets. IT teams need to show auditors that appropriate due care is being exercised by users and processes. But those same teams need a lightweight, fast, efficient way to access where that data is and what risk it might pose. Qohash Recon™ makes it easy for your teams or your service providers to quickly determine where users keep sensitive data, all without huge overhead thanks to our lightweight sensor. Scans can be run one time or scheduled in advance. With Recon™ results, enterprises can tailor their response to the severity, impact and business needs.

“ Qohash Recon™ offers targeted functionalities to rapidly deliver value, including detailed reports. ”
